Daily Pulses Report 06th February 2025

News Highlights

- The India Meteorological Department (IMD) on Thursday (February 6) said that a western disturbance currently positioned over North Pakistan and its associated trough has led to a significant temperature drop across North India. The system is gradually moving eastward, impacting weather patterns in the region.
- Due to limited demand from dal mills, the prices of tur, urad, chana, masoor and moong remained mostly stable in the domestic market.
- The extension of duty-free tur imports until March 2026 has driven prices below MSP, leaving farmers struggling. Traders prefer imports, while the Dal Mill Association urges policy reversal and an MSP hike to ₹9,000 to protect domestic growers and self-sufficiency.
- In Maharashtra's Deglur market, new chana was traded at ₹5,680 per quintal. Chana sowing in the current rabi season has reached 9.855 million hectares, compared to 9.587 million hectares during the same period last year.
- Australia exported 780,917 MT of chickpeas in December, with India accounting for 75% of the total. First-quarter exports reached 1.3 million MT, driven by strong Indian demand ahead of a possible tariff return in April and a high-quality Australian crop. December exports surged 88% from November.
- India was the largest buyer of Australian chickpeas in December, importing 589,198 MT (75% of total exports), while Bangladesh and Pakistan followed with 136,875 MT and 33,697 MT, respectively.
- Australia exported 239,900 MT of lentils in December, a five-fold increase from November, according to the Australian Bureau of Statistics. The surge was driven by new-crop availability and strong demand, despite a smaller harvest in Victoria and South Australia due to low rainfall.
- India was the largest buyer of Australian lentils, importing 114,365 MT, followed by Bangladesh with 81,854 MT and the UAE with 25,727 MT.
- Canada's lentil exports eased slightly in December, with shipments totaling 252,996 MT, down from 265,546 MT in November, according to Statistics Canada. However, total exports for the marketing year reached 1,083,037 MT, marking a 28% increase from last year.
- Turkey was the largest buyer of Canadian lentils, importing 67,614 MT, followed by India with 62,886 MT and the UAE with 33,678 MT.
- Canada's field pea exports declined in December to 171,007 MT, down from 200,990 MT in November, according to Statistics Canada. However, total shipments for the year increased 17%, reaching 1,437,800 MT.
- Bangladesh was the largest buyer of Canada's field peas, importing 94,224 MT, followed by China with 22,860 MT and India with 22,792 MT.
