Daily Pulses Report
12th November 2025

News Highlights

- *The IMD has warned of cold wave conditions in parts of Punjab, Haryana, and Chandigarh till November 12, with night temperatures expected to stay 2–4°C below normal. Despite dry weather and little change in temperatures over the next few days, rainfall in Punjab from November 1–10 was 1.6 mm, about 9% below the long-period average. However, since October 1, the state has recorded a significant seasonal surplus of 220% above normal rainfall.*
- *As of November 6, 2025, the Central Water Commission reported live storage of 165.278 BCM in 161 major reservoirs, which is 90.57% of their total capacity of 182.479 BCM. This level is 105.6% of last year's storage and 118.7% of the normal storage. The reservoirs monitored include 20 hydroelectric projects with a combined capacity of 35.299 BCM, indicating an overall comfortable water storage position across the country.*
- *India's 2025–26 Kharif tur (pigeon pea) production is estimated at 3.2–3.3 million MT, about 7–10% lower than last year's 3.56 million MT, according to a government official. While initial reports from Maharashtra and Karnataka indicated 40–50% crop damage, conditions have improved with favorable weather. Production is not expected to fall below 3.0 million MT, and trade estimates are broadly in line with the government's projection.*

  *Vessel *M.V. SEA EAGLE*, carrying 38,506.120 MT of Desi Chickpeas (Chana) from Australia, is expected to arrive at Kandla Port on November 13, 2025, as per shipping agency reports.*
- *Bangladesh has signed a deal to purchase $1.25 billion worth of U.S. soybeans and soybean meal over the next 12 months, effectively shifting most of its commodity imports to U.S. origin, according to the USSEC. The move underscores Bangladesh's growing demand for high-quality protein sources for its aquaculture and poultry sectors and reflects confidence in the quality, reliability, and sustainability of U.S. soy products.*
- *Ukraine exported 10.01 million MT of grains and legumes in MY 2025-26, down 38.4% from last year, according to the Ministry of Agrarian Policy and Food. Wheat exports totaled 6.51 million MT (down 21.4%), barley 1.13 million MT (down 34.8%), and corn 2.19 million MT (down 63.1%). Flour exports stood at 22.5 thousand MT (or 30 thousand MT in grain equivalent), 20.7% lower year-on-year.*
- *Australia exported 2.1 million MT of chickpeas and 1.05 million MT of lentils in the year to September 30, 2025, as per Australian Bureau of Statistics data. Chickpea exports hit a record high, more than doubling from 2023–24 levels, while lentil exports dropped sharply due to drought in South Australia. India was the top buyer of both pulses—importing 1.41 million MT of chickpeas and 0.37 million MT of lentils—followed by Pakistan and Bangladesh for chickpeas, and Bangladesh and Sri Lanka for lentils.*
