Daily Pulses Report 02nd December 2025

News Highlights

- *India's rabi sowing is off to a strong start, with 62% of the normal area already planted, supported by early sowing and favourable weather. Mustard has covered 97% of its normal area, while chana and wheat have reached 62% and 60%, respectively. Total sown area reached 39.31 million ha by November 28, up nearly 10% from last year, with wheat acreage rising sharply to 18.74 million ha. Other crops like paddy, maize, barley, jowar, and nutri/coarse cereals have also recorded higher acreage compared to last year.*
- *Burma's urad exports in 2025 totaled 0.80 million MT, slightly lower than 2024, showing a 4.1% decline. Monthly trends were mixed and strong growth was seen in February, September, and November, while sharp drops occurred in May, July, and June. Despite some months outperforming last year, overall exports slipped due to significant mid-year reductions.*
- *In the global market, edible oil prices strengthened during the evening session. Malaysian palm oil gained more than 1.5%, while soybean oil prices in Chicago also moved higher. According to analysts, Malaysian palm oil futures closed stronger on Tuesday as rising prices of other edible oils worldwide supported market sentiment.*
- *Australia Weather: Severe Tropical Cyclone Fina hit the northeast Kimberley coast on November 25, bringing intense rain. Storms driven by troughs and humid air produced 15–50 mm across much of northern, central, and eastern Australia, with some areas topping 150 mm. Southern regions saw 5–50 mm. The week's highest total was 223 mm at Wyndham Aero, including 147 mm in a single day from Fina.*
- *ABARES has lifted estimates for Australia's 2024-25 pulse crops. Chickpea production is put at 2.12 million MT, the second-largest on record after last year. Lentils are forecast at a record 1.91 million MT, 11% above the September estimate, while faba beans are expected to reach 930,000 MT, surpassing last season's record. Lupin output is forecast at 991,000 MT, its biggest crop since 2021-22.*
- *Chickpea prices have risen to about \$640/MT delivered Brisbane, supported by good crop quality but overshadowed by uncertainty over a likely increase in India's import tariff from 10% to 30%. With India's domestic prices below MSP and a large crop coming, both exporters and importers are cautious, and many Australian growers are holding back sales. Bangladesh has provided early demand ahead of Ramadan, with limited buying from Pakistan, the Middle East, and Nepal, though container prices have softened.*
