Daily Pulses Report

22nd January 2026

News Highlights

- *The IMD has forecast heavy rainfall and thunderstorms over Jammu and Kashmir, Ladakh, Gilgit-Baltistan and Muzaffarabad, with lightning and gusty winds likely across Himachal Pradesh, Punjab and Rajasthan till tomorrow. Similar weather is expected over Gujarat, Tamil Nadu, Puducherry and Karaikal for the next two days, while dense fog may affect Sub-Himalayan West Bengal and Sikkim on the 24th, alongside a 2–3°C rise in minimum temperatures over parts of Central India.*
- *NAFED released the results of its auction held on 21 January 2026, covering moong, mustard seed and tur across multiple states. Moong prices ranged from ₹5,461–7,503/100 kg in Madhya Pradesh and Odisha, while mustard seed traded up to ₹6,477/100 kg in Haryana, and tur in Uttar Pradesh fetched ₹6,011–6,077/100 kg.*
- *Pulses imports at Chennai port during 9–15 January 2026 totaled about 20,175 MT across 807 containers, led by Burma urad (9,725 MT) and Burma tur (4,025 MT). Other arrivals included tur from Tanzania and Mozambique, chana from Australia and Tanzania, along with smaller volumes of masoor, cow peas, and various beans.*
- *Tur imports declined 8% to about 1.05 million MT during Jan–Nov 2025 compared with the same period last year, reflecting lower arrivals across major supplying regions. The slowdown in imports points to relatively improved domestic availability and cautious buying amid price and policy uncertainties.*
- *Urad imports surged 42% to about 0.98 million MT during Jan–Nov 2025, up from 0.69 million MT in the same period last year, driven mainly by higher shipments from Myanmar. The sharp rise highlights strong import dependence amid tight domestic supplies and steady demand.*
- *Canadian pulse growers received a major boost as China announced the full removal of 100% tariffs on Canadian agricultural imports, including yellow peas, following Prime Minister Mark Carney's visit to Beijing on Jan. 14–16. Industry leaders expect shipments to China Canada's largest yellow pea market to resume immediately, though exporters remain cautious as India continues to levy a 30% tariff, prompting Canada to further diversify pulse export markets.*
