Daily Pulses Report 04th February 2026

News Highlights

- *The IMD has warned of unsettled weather across north and northwest India as three western disturbances move through the region over the coming week. Rain, snowfall, thunderstorms, hail and dense fog are likely across the western Himalayas, with thunderstorms and isolated hail expected in parts of Uttar Pradesh, while Delhi NCR may see dense morning fog, gusty winds and near-normal temperatures.*
- *The vessel MV HPC WISDOM, carrying 25,000 MT of Australian red lentils (masoor), is scheduled to arrive at Mundra Port on 10 February 2026, according to shipping agency reports.*
- *In the current rabi season, the sowing area of pulse crops has increased to 13.955 million hectares, compared with 13.452 million hectares during the same period last year. Among rabi pulses, sowing of chana (gram) has risen to 9.620 million hectares so far this season, against 9.122 million hectares at the same time last year.*
- *India's Tur (Pigeon Pea) imports surged sharply in Apr–Nov 2024, reaching 1.22 million MT, up from 0.78 million MT in the same period of 2023 and 0.95 million MT in 2025. Mozambique (341,919 MT) and Myanmar (261,220 MT) remained the largest suppliers, followed by Tanzania (318,996 MT). Cumulative imports for Apr 2021–Nov 2025 stood at 0.84 million MT (2021), 0.89 million MT (2022), 0.77 million MT (2023), 1.22 million MT (2024) and 0.95 million MT (2025), highlighting strong volatility driven by domestic supply gaps and policy support.*
- *Moong prices eased in Jaipur and stayed mostly steady elsewhere. With need-based buying by mills, limited MSP procurement, continued arrivals, and ongoing central pool sales, any sharp price rise looks unlikely in the near term.*
- *Global edible oil markets showed a mixed trend. Malaysian palm oil prices ended higher, while soy oil prices softened in Chicago. According to traders, crude palm oil (CPO) futures closed with marginal gains on Wednesday at the Bursa Malaysia Derivatives Exchange. However, palm oil prices did not rise as much as expected despite supportive cues from the energy market and firmness in China's edible oil prices, as the stronger ringgit and uncertainty over demand weighed on market sentiment.*
