Daily Pulses Report 06th February 2026

News Highlights

- As per IMD, weather conditions remain largely stable across India, with clear skies in most regions and foggy, cool mornings in parts of north India. Isolated rain and snowfall are likely over the western Himalayas next week, while temperatures may fluctuate across regions, with Delhi seeing foggy mornings and strong daytime winds.
- NAFED's latest auction saw Masoor and Moong from Madhya Pradesh, and Mustard Seed from Haryana, MP, and Rajasthan. Prices ranged up to ₹6,012/qtl for Masoor, ₹6,514–6,722/qtl for Moong, and ₹6,311–6,656/qtl for Mustard Seed, reflecting steady demand across key producing states.
- Australia's pulse exports strengthened in December, with chickpea shipments rising 57% to 0.588 million MT and lentil exports surging 124% to 0.411 million MT. Cumulative chickpea exports stood at 0.962 million MT, lower than 1.134 million MT last year, while lentil exports increased sharply to 0.595 million MT from 0.297 million MT. India remained the leading destination for both pulses, followed by Bangladesh and Pakistan.
- Imported urad prices in Chennai were steady. Domestic prices eased, but higher import costs may lend support going forward. Demand in South India remains firm due to the consumption season, though steady arrivals and imports limit upside. Traders say that with the start of the papad-making season in north India, demand for urad mogar is expected to increase. Supplies from Madhya Pradesh, Rajasthan, Gujarat, Maharashtra and Karnataka may tighten, forcing papad manufacturers to rely on Myanmar urad and arrivals from Andhra Pradesh's Krishna district.
- Imported lemon tur prices in Chennai weakened in dollar terms, while prices in Myanmar also declined. As a result, weak buying by dal mills pressured tur prices in the domestic market. Traders said softer Myanmar lemon prices have made imports cheaper, and after the recent rise, selling has increased locally, which may lead to further downside, although importers are attempting to push prices higher. Limited procurement of tur at MSP is also underway in Karnataka mandis.
- Global edible oil prices declined for a second consecutive day. Malaysian palm oil futures closed lower, while soy oil prices in Chicago also weakened. Traders said crude palm oil (CPO) futures on Bursa Malaysia fell for a second straight session on Friday due to weaker export demand, softness in other edible oil markets, and a stronger Malaysian ringgit weighing on market sentiment.
