## Daily Pulses Report 09<sup>th</sup> February 2026

### News Highlights

- According to the IMD, North India is likely to witness active weather till February 10 under the influence of a western disturbance, bringing rain and snowfall over Jammu & Kashmir, Ladakh, Himachal Pradesh and Uttarakhand. IMD has also warned of dense to very dense fog over parts of the northern plains, issuing an orange alert for Uttar Pradesh, with thunderstorms and gusty winds possibly causing localized disruptions in hilly areas.
- Urad prices remained mixed during the week ended 8 Feb 2026. Burma Urad FAQ eased slightly due to weak miller buying amid slow urad dal offtake, while Burma Urad SQ strengthened on active demand and tight ready stocks, supported by firmer Myanmar CNF quotes. Brazil urad stayed firm on slow shipments, while domestic markets traded range-bound with selective buying, though prices in parts of Uttar Pradesh rose on lower arrivals and localized demand.
- Tur prices corrected across major markets in the week ended 7 Feb 2026, halting the recent rally amid softer global cues, a stronger rupee lowering import costs, buyer resistance at higher levels, and improved arrivals from key producing states. Profit booking emerged across imported, bilty and mandi segments, while tur dal prices also softened on weak demand. Millers from MP and Chhattisgarh have shifted sourcing to Maharashtra's Vidarbha and Marathwada regions due to better availability, quality and prices above MSP, while Salem millers continue to source from Karnataka.
- Chana prices eased across major markets in the week ended 7 Feb 2026, as rising domestic and imported arrivals weighed on sentiment and halted the recent firm trend. Miller buying remained limited to hand-to-mouth needs due to weak chana dal and besan demand at higher levels. Increased availability of cheaper Australian chana, higher west-coast imports, and bumper new-crop arrivals from Karnataka, Gujarat and Maharashtra continue to keep prices under pressure.
- Union Agriculture Minister Shivraj Singh Chouhan announced ₹191.67 crore for Karnataka under the National Pulses Mission and released ₹154 crore pending under RKVY at the International Trade Fair 2026 in Bengaluru. The package includes 25 seed villages for tur, incentives for farmers, and subsidies for dal mills, aimed at boosting pulse production, value addition, and farmer incomes in the state.
- Canada Markets appear near the cycle low, with gradual recovery expected. China may resume Canadian pea imports from March 1, with China and India each likely to import 0.8 million MT of Canadian peas in 2025/26. Lentil prospects hinge on supply adjustment, with Canada competing against Australia's 1.9 million MT crop and aiming for lower acreage and yields to curb ending stocks.
