Daily Pulses Report 17th February 2026

News Highlights

- *The India Meteorological Department (IMD) has forecast light to moderate rain and snowfall over the Western Himalayan region on 17–18 February due to a Western Disturbance, with light rain and thunderstorms likely over northwest India. Hailstorms may occur in parts of Punjab, Haryana, and East Rajasthan on 18 February, while dense morning fog is expected in isolated areas of Odisha and Coastal Andhra Pradesh & Yanam until 19 February.*
- *India's 2025 summer pulses sowing increased by around 15–16% year-on-year to 0.058 million hectares, compared to 0.050 million hectares last year. Moong area stood at 0.044 million hectares, urad rose to 0.010 million hectares, and other pulses increased to 0.004 million hectares, reflecting improved early-season coverage.*
- *Green lentils declined more than red lentils amid rising concerns over higher leftover stocks. Although global exports from harvest to December exceeded last year's levels, traders remain cautious about the export pace relative to available supplies. Due to relatively higher supply, stock pressure is weighing more heavily on green lentils than on red varieties.*
- *International pulse markets ended the week mixed, with green lentils declining more than red lentils due to concerns over higher leftover stocks despite stronger export shipments so far this season. At the same time, field pea prices remained largely steady amid uncertainty over demand from China and India for the remainder of the 2024–25 marketing year, with spot prices in North America unchanged while new crop bids in Canada rose 6% to \$195 per MT for cleaned peas delivered to processing plants.*
- *International pulse markets ended the week mixed, with green lentils declining more than red lentils on concerns over higher leftover stocks, while field pea prices remained steady amid demand uncertainty from China and India. Chickpea prices also saw limited movement, with moderate trade in both current and new crop, as market participants shifted focus to upcoming seeding intention reports from Australia (March 3), Canada (March 5), and the United States (March 31) for clearer direction on 2025 planting prospects.*
- *Malaysian palm oil futures remained closed due to a holiday. According to traders, daily arrivals of mustard in producing mandis have increased compared to earlier levels, and given the favorable weather conditions, further pressure from higher daily arrivals is expected in the coming days.*
- *Australia weather: Severe Tropical Cyclone Mitchell made landfall in Western Australia on February 10, bringing widespread rain across WA, the Northern Territory, and Queensland, with weekly totals reaching up to 300 mm. Thunderstorms and localized flooding were reported in Queensland, while a cold front linked to the system brought showers and isolated snow to parts of south-eastern Australia.*
