Daily Pulses Report 04th May 2026

News Highlights

- *IMD has forecast heavy to very heavy rainfall across Northeast India, including Assam, Meghalaya, Sikkim, and Sub-Himalayan West Bengal, with additional heavy showers in parts of South India. Thunderstorms with gusty winds are likely across central and northern regions, while coastal Andhra Pradesh, Karnataka, and Tamil Nadu may see hot and humid conditions.*
- *Summer Pulses sowing in India has shown a modest increase, with total area reaching 2.35 million hectares compared to 2.28 million hectares last year, up 3.2% YoY. Urad sowing stood at 0.42 million hectares (vs 0.36 million ha last year), while other pulses also recorded gains, indicating steady progress in overall coverage.*
- *The vessel M.V. BH VOYAGE carrying 74,326 MT of pulses from Canada—comprising 46,066 MT of lentils (masoor) and 28,260 MT of yellow peas is scheduled to arrive at Hazira Port on May 6, 2026, as per shipping agency reports.*
- *In the week ending 2 May 2026, urad prices remained weak due to poor demand, need-based buying, and low HoReCa activity, with Myanmar material trading below landed cost in Chennai. Negative import parity and subdued sentiment continued to weigh on the market.*
- *In the week ending 2 May 2026, tur prices declined across major markets due to weak demand, cautious miller buying, and ample supplies. High stocks with traders, steady arrivals, and government inventories kept pressure on prices, while imported tur remained uncompetitive with negative import parity and limited price advantage over desi.*
- *In the week ending 2 May 2026, chana prices showed underlying firmness due to lower arrivals and strong MSP procurement, though overall trade remained weak amid slow, need-based buying and low HoReCa demand. Ample stocks at ports and ongoing arrivals capped upside, while imports stayed unviable despite softer global prices.*
- *In the global market, edible oil prices strengthened during the evening session. Malaysian palm oil prices rose by more than 1%, while soybean oil prices in Chicago also moved higher. According to traders, Malaysian palm oil futures closed higher on Monday, supported by global firmness in edible oil prices and investor buying; however, gains remained near key resistance levels due to ongoing concerns about weak spot demand.*
