## Daily Pulses Report 10<sup>th</sup> April 2026

### News Highlights

- *The India Meteorological Department indicates that the monsoon is entering a transitional phase, with active rainfall and thunderstorms continuing over the Northeast and southern regions, while Northwest and central India turn drier with rising temperatures. This shift is driven by the weakening of western disturbances, though a fresh system is expected to impact the Western Himalayan region around April 15.*
- *The pulses market remained largely steady, with minor fluctuations. Tur showed mixed movement, masoor gained in Delhi, while urad and kabuli weakened in select markets. Moong and chana remained stable.*
- *Pulses imports at Chennai from 25th to 31st March 2026 totaled 25,400 MT across 1,016 containers. Myanmar remained the dominant supplier, particularly in urad (10,375 MT) and tur (8,025 MT), followed by Canada masoor (3,750 MT) and Brazil urad (1,850 MT). Smaller volumes were imported from Tanzania, Kenya, and other origins across various pulses.*
- *CropLife India has advised farmers to prioritise timely sowing and scientific crop management in the ongoing zaid season, especially after rabi crop losses due to unseasonal rains and hailstorms. It highlighted that delays in sowing could reduce yields, urging the use of heat-tolerant varieties, proper irrigation, and pest monitoring to safeguard productivity and farm incomes.*
- *Imported Myanmar urad FAQ and SQ prices remained stable in Chennai, with FAQ quoted at \$850/MT and SQ at \$945/MT (CNF) for April–May shipments. Urad prices in Chennai remained stable, while prices in Myanmar have paused after a recent rise. Limited demand from dal mills kept domestic prices steady to slightly weak, though higher import costs have slowed selling by importers. With low stock at mills and reduced arrivals in producing mandis, demand—especially from South India—is expected to support prices going forward.*
- *Australia exported 179,335 MT of lentils in February, down 36% month-on-month but higher than 147,924 MT a year ago. India and Bangladesh remained the key buyers, followed by Sri Lanka and Egypt, indicating steady demand despite lower monthly shipments.*
- *Australia exported 292,347 MT of chickpeas in February, sharply higher than January and broadly in line with last year. India remained the dominant buyer, followed by Pakistan, UAE, and Nepal. However, geopolitical tensions around the Strait of Hormuz may impact UAE demand in the near term, though a US-Iran ceasefire could support smoother trade flows ahead.*
