Daily Pulses Report 14th April 2026

News Highlights

- *India Meteorological Department warns of a heat wave across central and western India from April 14–18, with temperatures rising 4–6°C in northwest regions and 2–5°C in Maharashtra and Madhya Pradesh. Meanwhile, northeastern states like Assam and Meghalaya are likely to receive rainfall and thunderstorms.*
- *On the occasion of Dr. B. R. Ambedkar Jayanti and Baisakhi festival, most Indian mandis will remain closed today.*
- *Today's pulses market was mixed—tur steady, chana weak, urad mostly stable with slight gains, and moong under pressure in Delhi. Masoor was mixed, Yellow pea declined, while Kabuli Chana remained unchanged.*
- *India has announced setting up 1,000 pulse mills under the National Pulses Self-Reliance Mission, with up to ₹25 lakh subsidy per unit. Madhya Pradesh will get 55 mills, aiming to boost processing capacity and farmer incomes alongside strong pulse production.*
- *Australia Weather: A series of troughs and cold fronts brought light to moderate rainfall across southern Australia, with 5–50 mm recorded across key regions and over 100 mm in elevated areas of Victoria and Tasmania. The Top End also saw scattered showers (10–50 mm), with the highest weekly rainfall at Mount Read (162 mm) and peak daily rainfall at Falls Creek (91 mm).*
- *In the evening session, global edible oil prices declined. Malaysian palm oil fell by over 1.75%, while Chicago soy oil also weakened. Palm oil futures closed at a five-week low on Tuesday due to sustained selling pressure and weakness in other edible oils.*
- *Malaysia has raised its May crude palm oil reference price to RM 4,521.89/MT, triggering the maximum 10% export duty. The move reflects stronger global prices and may impact international edible oil markets by increasing costs for importers.*
- *Soybeans: United States planting reached 6% by April 12, ahead of expectations and 4 points above the five-year average, with acreage projected to rise to 84.7 million acres (+4.3%).*
