Daily Pulses Report 14th May 2026

News Highlights

- *The IMD has forecast widespread thunderstorms, heavy rainfall, lightning, and gusty winds across several parts of India over the next few days, especially in northern, eastern, northeastern, and southern regions. At the same time, heat wave conditions are expected to continue across parts of Rajasthan, Gujarat, Maharashtra, and Madhya Pradesh, with temperatures likely to rise further in northwest and central India.*
- *Pulse markets remained firm today as Tur gained ₹100/quintal in Akola and Solapur, while Chana prices rose sharply in Raipur, Bikaner, and Delhi. Urad showed mixed movement, whereas Moong and Masoor remained steady, and Kabuli Chana in Indore increased by ₹100/quintal.*
- *NCCF confirmed PSS Moong sale transactions on 12 May 2026, with major sales reported from Jaipur and Bhopal warehouses. Jaipur's CW Parbatsar warehouse recorded Moong sales of 200 MT at ₹7,105/quintal, while Bhopal's Shahpura Bhedaghat warehouse sold 176.5 MT at ₹6,501/quintal. The update reflects continued government-led pulse stock liquidation under the PSS mechanism.*
- *Oilseed prices remain under pressure after the USDA projected a 13% increase in global sunflower production and a 3.5% rise in soybean output for the new season, supported by larger acreage and favorable yields. Weather conditions are currently supportive for sunflower sowing in the Black Sea region and soybean planting in the US, further weighing on market sentiment.*
- *Combined soybean exports from the US and Brazil to China rose 10% year-on-year to a record 37 million MT during January-April 2026, according to Oil World. China increased the share of US soybeans in its imports to 55% from 41% last year, while Brazil's share declined to 69%, although Brazil still exported a record 16.75 million MT of soybeans in April.*
- *Brazil strengthened its position as the world's top soybean exporter, with January-April 2026 exports reaching a record 40.24 million MT. April shipments also hit an all-time high of 16.75 million MT, up 15.35% from March and 9.6% from last year, driven mainly by strong Chinese demand, with exports to China rising 17.6% during the month.*
- *Grain transshipment at Poland's Gdynia port increased 13% year-on-year during January-April 2026 to 1.67 million MT, supported by uninterrupted operations at three major terminals. The port is also preparing to launch another grain terminal, which is expected to add around 10% to Gdynia's total grain handling capacity.*
