Daily Pulses Report
07th August 2026

News Highlights

- *The southwest monsoon remains active, with the IMD forecasting heavy to very heavy rainfall across much of India over the coming days. Odisha is at risk of isolated extremely heavy rain, while north, east and west India are expected to receive widespread showers with thunderstorms and strong winds. Delhi-NCR may experience intermittent rain, waterlogging and traffic disruptions, with active monsoon conditions continuing across most regions.*
- *Today's Market: Tur and urad prices weakened across major markets amid cautious buying and adequate supply, while chana remained mixed with losses in Delhi and steady trade elsewhere. Moong, matar and kabuli remained unchanged, whereas masoor traded mixed with a decline in Delhi and gains in Kolkata.*
- *India Kharif Pulses Sowing Update (as of 07 Aug 2026): Total pulses sowing reached 91.67 million hectares, down 1.63% from 93.19 million hectares last year. Tur acreage stood at 37.53 million hectares (-6.5% YoY), while Urad increased to 22.86 million hectares (+12.67% YoY). Moong declined to 31.32 million hectares (-5.25% YoY), with Kulthi up 7% and Other Pulses down 6.48%.*
- *NAFED PSS Tender Update (07 Aug 2026): Highest bids for Rabi-26 Chana remained firm, led by Nagpur (₹6,461/quintal), followed by Amreli (₹6,414), Vidisha/Chhindwara (₹6,411) and Sriganganagar (₹6,251). The highest bid for Rabi-24 Masoor was ₹6,206/quintal at Sagar (Banda), while Rabi-23 Chana at Mandsaur recorded a highest bid of ₹5,839/quintal.*
- *Tamil Nadu has launched a five-year Mission for Self-Sufficiency in Pulses and Oilseeds with an outlay of ₹203.64 crore to reduce import dependence and strengthen food security. The state aims to increase pulses production from 0.388 million MT to 0.772 million MT and edible oilseed production from 0.877 million MT to 1.614 million MT by expanding cultivated area and improving productivity.*
- *Global edible oil markets showed a mixed trend in the evening session. Malaysian palm oil futures eased for the October contract due to higher July production, slower exports at the start of August, and expectations of rising inventories. Meanwhile, Chicago soybean oil prices recovered, providing some support to the global vegetable oil market.*
- *China has stepped up purchases of U.S. soybeans, with state-owned Sinograin buying 10–15 cargoes for October–November 2026 shipment, following recent U.S.-China trade talks. Stronger Chinese demand, combined with USDA's confirmation of a 122,000 MT sale, signals improving trade relations and is expected to support U.S. soybean exports despite favorable U.S. crop prospects.*
