Daily Pulses Report
14th August 2026

News Highlights

- *IMD expects widespread rainfall across northwest, central and northeastern India through 20 August, with heavy spells over Madhya Pradesh, Chhattisgarh, Himachal Pradesh, Uttarakhand and parts of Uttar Pradesh. The Northeast will remain active, while southern and western India are likely to see scattered showers. Rising river levels in Jharkhand are also increasing flood concerns.*
- *Today's Market: Tur remained steady in Akola and Solapur, while Chennai gained ₹100. Chana was mixed, with Delhi lower and Bikaner higher. Urad weakened, led by Chennai SQ (-₹75), while moong remained unchanged across all markets. Masoor was mixed, matar and kabuli chana remained steady.*
- *India Kharif Pulses Sowing – 14 August 2026: Total pulses acreage stood at 10.41 million hectares, compared with 10.44 million hectares last year. Urad acreage increased 13.15% YoY, while moong declined 4.11% and tur fell 3.06%.*
- *India's urad imports declined 19% to 0.34 million MT during January–June 2026, compared with 0.42 million MT in the same period last year. Myanmar remained the largest supplier, followed by Brazil and Thailand.*
- *India's tur imports rose 43% to 0.51 million MT during January–June 2026, compared with 0.36 million MT in the same period last year. Myanmar remained the largest supplier, followed by Mozambique, Tanzania and Sudan.*
- *NAFED Chana Tender Bid Rate – Rabi 2026: Madhya Pradesh recorded the highest bid at ₹6,464/quintal, followed by Maharashtra at ₹6,441, Gujarat at ₹6,352, Andhra Pradesh at ₹6,210, Rajasthan at ₹6,151, and Uttar Pradesh at ₹5,818/quintal.*
- *China is accelerating purchases of US soybeans and could potentially buy 50–60% of its 25 million MT annual commitment by late September. Strong Chinese demand could tighten US soybean supplies, shift more Chinese buying toward Brazil from other importers, and provide upside support to global soybean prices.*
- *Vietnam Biofuel Update: FatHopes Energy and PVOIL have agreed to establish Vietnam's first nationwide used cooking oil (UCO) collection system, with the feedstock to be used for sustainable aviation fuel (SAF) and other biofuels. The system will initially launch in Ho Chi Minh City before expanding nationwide, supported by PVOIL's network of around 1,000 filling stations and FatHopes Energy's traceability technology.*
- *Russia has rejected a return to the 2022–23 Black Sea Grain Initiative and sees no basis for a separate maritime ceasefire. Continued attacks on ports and vessels are disrupting Russian and Ukrainian grain exports, raising the risk of tighter Black Sea wheat supplies and increased global price volatility.*
