# Daily Pulses Report
# 04th September 2026

## News Highlights

- *IMD has warned of heavy to very heavy rainfall across key wheat-growing regions, with East Rajasthan and West Madhya Pradesh under a very heavy rainfall warning on September 5. Heavy rain is also expected in Haryana, Punjab, Uttar Pradesh and Bihar over the next few days, which could disrupt field preparation and early wheat sowing activities.*
- *Today Market: Pulses markets were broadly firm, with Tur gaining ₹50/quintal in Akola and Solapur, while Chennai Tur eased ₹25. Chana strengthened across Delhi, Raipur and Bikaner, while Urad and Moong also saw selective gains. Masoor rose marginally in Delhi, whereas Matar remained unchanged across major markets.*
- *Canada's field pea exports fell sharply by 55% MoM to 83,278 MT in July from 185,170 MT in June. However, marketing-year exports reached 2.66 MMT, up from 2.19 million MT last year, indicating strong overall export demand despite the July slowdown. China remained the largest buyer at 42,686 MT, followed by the US at 14,590 MT and Thailand at 5,368 MT.*
- *Canadian lentil exports fell 8% MoM to 156,609 MT in July from 170,565 MT, but marketing-year exports reached 2.44 million MT, up sharply from 1.84 million MT last year. India was the second-largest buyer at 45,511 MT, behind Turkey.*
- *Australian lentil exports surged more than six-fold MoM to 175,358 MT in July from 28,334 MT, with India the largest buyer at 78,228 MT, followed by Bangladesh and Pakistan. Marketing-year exports reached 1.44 million MT, up 54% YoY, highlighting strong export demand.*
- *Australian chickpea exports rose sharply to 92,168 MT in July from 57,236 MT in June. However, marketing-year exports reached 1.56 million MT, down 19% YoY, with Bangladesh the largest buyer at 50,035 MT, followed by India at 35,997 MT.*
- *Malaysian palm oil futures gained 0.55% on September 4 to 4,931 ringgit/t, supported by concerns that El Niño could reduce palm oil production in Malaysia and Indonesia. However, weaker rival vegetable oils and lower crude prices limited gains, while Indonesia's plan to raise palm oil production to 1.5 million MT next year could provide longer-term supply pressure.*
- *US soybean crushing rose 8% YoY to 6.66 million MT in July 2026, supporting higher soybean oil production. Crude soybean oil output increased 6% YoY to 2.57 billion pounds, while refined soybean oil production rose 10%, indicating strong processing activity and ample oil availability.*
