Daily Pulses Report
09th September 2026

News Highlights

- *According to the India Meteorological Department (IMD), heavy rainfall is forecast over Bihar, Jharkhand, Gangetic West Bengal, Odisha and parts of Northeast India, while thunderstorms with gusty winds are expected in southern and island regions. For wheat, the rainfall may improve soil moisture in eastern and northern areas ahead of the rabi sowing season.*
- *El Niño-driven rainfall deficits have severely affected red gram (tur) in Rayalaseema, with prolonged dry spells and high temperatures causing major crop damage. Farmers are reportedly clearing failed red gram fields, raising concerns over domestic tur production and supply from the region.*
- *Chana Sell Tender – 9 Sep 2026: NAFED's highest bid was ₹6,625/qtl at Nanded, up ₹60, followed by ₹6,502/qtl at Ganganagar (+₹101) and ₹6,474/qtl at Rajkot (+₹42). In the Nafed tender, Baran (Antah) recorded the highest bid at ₹5,913/qtl, up ₹244.*
- *NCCF PSS Sale Confirmation – 5 Sep 2026: NCCF sold Moong at ₹7,007/qtl from Bhopal, with total confirmed quantity of 7,744.0 MT across two lots. Urad was sold at ₹6,643/qtl in Mumbai (68.95 MT) and ₹6,161/qtl in Ahmedabad (48.32 MT).*
- *India's pulses self-sufficiency strategy aims to boost domestic production through assured MSP procurement of tur, urad and masoor while reducing import dependence. However, frequent stock and movement controls can discourage private trade and investment; stable prices, procurement and market-based risk management are essential for long-term growth.*
- *Global edible oil prices were mixed in the evening session, with Malaysian palm oil easing while Chicago soybean oil gained. Palm oil futures closed lower as traders remained cautious ahead of the MPOB August supply-demand report due on September 10.*
- *Malaysia's palm oil production is expected to remain seasonally strong in the next 2–3 months, while high stocks may limit near-term price gains. However, El Niño and dry conditions could tighten regional supply in 2027, supporting prices, with BIMB Research forecasting CPO at MYR 4,400/MT in 2026 and MYR 4,500/MT in 2027.*
- *Shipping delays through Ukraine's Sulina Canal are worsening, with around 13 vessels waiting to exit and inspection delays rising from about 1 day to 3–4 days. Limited waiting capacity and adverse weather could further increase queues, disrupting outbound grain shipments.*
