Daily Pulses Report
10th September 2026

News Highlights

- *IMD has issued a red warning for Odisha, with heavy to very heavy rainfall and isolated extremely heavy rain. Heavy rainfall is also expected across several eastern, central and northeastern states over the next 3–4 days, with thunderstorms and gusty winds in parts of south and central India.*
- *Today Market: Tur was mixed, with Solapur down ₹50 while Chennai gained ₹50. Chana gained ₹25–50 across key markets; moong rose ₹100 in Jaipur. Urad was mixed, while masoor and kabuli remained unchanged; matar gained ₹25 in Kanpur.*
- *India's monsoon rainfall deficit has reached 15%, with nearly half of districts reporting below-normal rainfall, raising concerns over pulses and oilseed yields. High temperatures and water rationing in some states are adding to moisture stress and could also affect rabi crop planting and production.*
- *NAFED Chana Tender Result – 09 Sept 2026: Karnataka ₹6,507/q, Maharashtra ₹6,601+/q and Rajasthan ₹6,502/q were passed. Bids from Andhra Pradesh, Madhya Pradesh and one Rajasthan bid were rejected.*
- *NCCF Summer 2025 Moong (Cluster 5) Tender: The earlier offer of ₹6,401/q for 6,254 MT was rejected in the tender held on 8 September 2026, according to trade sources.*
- *Canada's dry pea stocks rose 141.7% YoY to 1.2 million MT as of July 31, 2026, supported by higher 2025 production. Exports increased 22.2% to 2.7 million MT, while on-farm stocks surged 245.8% to 0.875 million MT. Lentil stocks rose 128.9% YoY to 1.3 million MT as of July 31, 2026. Lentil exports reached 2.4 million MT, up 32.6% YoY.*
- *Global edible oil prices remained weak, with Malaysian palm oil falling more than 1.5% and Chicago soybean oil also declining. Malaysian palm oil futures closed lower amid expectations of a larger-than-expected MPOB August inventory build, weaker September export estimates and weakness in other edible oils.*
- *India's 2026-27 soybean production is forecast by USDA at 9.6 million MT, down 8%, due to erratic monsoon rainfall and a shift in acreage toward cotton and corn. Soybean crushing is projected at 8.7 million MT, while imports are expected to rise to 0.5 million MT from the previous 0.2 million MT forecast, amid strong domestic food and feed demand.*
- *Malaysian palm oil futures fell 1.63% to MYR 4,885/MT on September 10, extending losses for a third session, pressured by weaker rival vegetable oils and rising inventories. August stocks reached an eight-month high as production rose to its highest level since December, while September 1–10 exports fell 11.7–17.5% from the same period in August.*
