Daily Pulses Report
11th September 2026

News Highlights

- *IMD has issued an orange warning for heavy to very heavy rainfall over Chhattisgarh, Coastal Andhra Pradesh and Odisha, with heavy rain also expected across Madhya Pradesh, Telangana, Vidarbha and several other states. Thunderstorms with lightning and gusty winds are likely in Odisha, Tamil Nadu, Telangana, Jharkhand, West Bengal and adjoining areas over the next 1–2 days.*
- *Today Market: Tur, chana, matar and kabuli remained unchanged across key markets. Urad rose ₹50 in Chennai while Delhi and Guntur were unchanged; moong declined ₹100 in Jaipur. Masoor was mixed, with Delhi down ₹50 and Katni up ₹25.*
- *NAFED Chana Tender – Best Bid: Maharashtra ₹6,595/q, Madhya Pradesh ₹6,501/q, Karnataka ₹6,524/q, Gujarat ₹6,537/q and Rajasthan ₹6,552/q. Chhattisgarh bid ₹6,301/q, Andhra Pradesh ₹6,521/q and Uttar Pradesh ₹6,001/q.*
- *NAFED – Bulk Disposal of Moong in Madhya Pradesh: NAFED plans to dispose of 203,547.642 MT (0.204 million MT) of moong through manual mode. This includes 40,547.07 MT PSF Moong (S-2024), 2,515.15 MT PSS Moong (S-2024), and 160,485.422 MT PSS Moong (S-2025).*
- *Tur dal prices strengthened, with all-India retail prices rising 1.7% MoM to ₹124.04/kg and wholesale prices up 2% to ₹11,471/quintal as of September 9, 2026. Despite tur acreage rising 1.61% YoY to 4.566 million ha, concerns over deficient September rainfall in Maharashtra and Karnataka are supporting prices. The rupee's depreciation to around ₹95/$ is also increasing the landed cost of duty-free imports.*
- *Malaysian palm oil futures fell 1.37% to MYR 4,818/MT, their lowest in two weeks, pressured by rising inventories and weaker exports. August stocks hit an eight-month high, while Sep 1–10 exports declined 11.7–17.5% from the previous month. Weaker rival edible oils added pressure, though firm crude oil prices near $100/bbl may limit further losses.*
- *The Philippines plans to secure up to ₱1 billion over five years to develop domestic palm oil production, targeting around 0.3 million hectares of oil palm plantations and reducing its current approx. 90% import dependence. The government also sees palm oil as a potential biofuel feedstock, with at least ₱300 million sought for the 2027 launch of the program.*
- *India's oilmeal exports fell 13% YoY to 0.957 million MT in Apr–Jun 2026, mainly due to a 66% decline in soybean meal shipments amid high domestic prices and cheaper supplies from Argentina and Brazil. June exports dropped 31% YoY to 0.218 million MT, while China and Bangladesh increased purchases, partly offsetting weaker exports elsewhere.*
