Daily Pulses Report **18th September 2026**

News Highlights

- *IMD has forecast heavy rainfall today in Bihar, Odisha, Sub-Himalayan West Bengal, Sikkim, Kerala and Rajasthan. Thunderstorms with lightning and gusty winds are expected in several states, including Uttarakhand, Andhra Pradesh, Gujarat, Madhya Pradesh, Karnataka and Konkan-Goa, with similar conditions continuing in parts of the south and Northeast over the next two days.*
- *Today's market witnessed a firm tone in tur, chana and urad, with tur up ₹50–100 across Akola, Solapur and Chennai, while chana gained ₹50–75 in Delhi and Raipur. Urad recorded stronger gains of ₹150–200 across Chennai SQ, Delhi SQ and Guntur. Moong remained unchanged across major markets, while masoor declined ₹25 in Delhi and Katni. Matar and kabuli remained unchanged across the reported markets.*
- *India's chana Jan–Jul 2026 imports totaled 641,564 MT, down sharply from 1.173 million MT in Jan–Jul 2025. Australia accounted for the largest share at 609,352 MT, followed by Burma at 1,064 MT and Tanzania at 29,533 MT, with imports concentrated mainly in January–March.*
- *India's yellow pea imports increased 11% year-on-year to 0.729 million MT during Jan–Jul 2026, compared with 0.657 million MT in the same period last year. Russia remained the dominant supplier with 0.463 million MT, followed by Australia at 0.058 million MT.*
- *NAFED's chana tender witnessed strong demand, with the highest bid in Maharashtra at ₹6,800/quintal, followed by Gujarat at ₹6,627 and Rajasthan at ₹6,601. Madhya Pradesh, Karnataka and Uttar Pradesh recorded bids of ₹6,551, ₹6,379 and ₹6,113/quintal, respectively, indicating firm buying interest amid limited government stocks.*
- *Pulse and oilseed prices have risen sharply year-on-year amid concerns over scanty rainfall and crop conditions. Wholesale tur prices are up more than 30%, chana 11%, soybean over 40% and groundnut around 50%, according to industry data. Moisture stress in Karnataka and Maharashtra has raised concerns over tur output, while drought conditions in parts of Karnataka and rainfall deficits in Maharashtra's Marathwada are adding uncertainty for the ongoing kharif crop and upcoming rabi sowing.*
- *Malaysian palm oil futures closed 0.77% lower at MYR 4,898/MT on Friday, tracking declines in Dalian soybean oil, Dalian palm oil and CBOT soybean oil, along with a nearly 2% fall in crude oil prices; however, palm oil gained 1.74% over the week. Market participants are also monitoring a possible cut in India's vegetable oil import duties and a stronger ringgit, while expectations of a 12–15% decline in palm oil output in Indonesia's Kalimantan region during Q4 due to prolonged dry weather and fires may provide support.*
