Daily Pulses Report 22nd September 2026

News Highlights

- *IMD has forecast heavy to Very Heavy Rainfall at isolated places over Coastal Andhra Pradesh and Odisha, with heavy rainfall likely in Assam, Meghalaya, Chhattisgarh, Gangetic West Bengal, Jharkhand, Karnataka, Konkan-Goa, Madhya Maharashtra and Telangana. Uttarakhand may receive isolated to scattered rainfall through Friday and West Madhya Pradesh till September 28, while Delhi is expected to remain mainly clear.*
- *Today's pulse market was mixed: Tur moved up in Akola and Chennai but declined in Solapur, while chana gained across Delhi, Raipur and Bikaner. Urad was mixed, moong rose in Delhi and Jaipur, masoor remained unchanged, matar eased in Kanpur, and kabuli gained in Indore.*
- *NAFED's chana tender results showed bids at ₹67.31/kg in Maharashtra for 4,880 MT, ₹66.01/kg in Rajasthan for 100 MT, and ₹66.21/kg in Gujarat for 4,560 MT. Net changes were +₹2.44/kg, +₹2.05/kg and +₹1.85/kg, respectively, while Karnataka, Andhra Pradesh and Madhya Pradesh tenders were rejected.*
- *Moong exports surged to 0.224 million MT during January–July 2026, up sharply from 0.043 million MT in the same period of 2025, driven by stronger demand from China. China was the largest destination at 0.166 million MT, followed by Bangladesh at 0.0095 million MT and Vietnam at 0.0093 million MT.*
- *Rajasthan recorded nearly 0.063 million MT of fresh moong arrivals since September 1, nearly 10 times the year-ago level. Average realisation was ₹7,452/quintal, 15% below the ₹8,780 MSP, while mandi prices rose from ₹7,000 to ₹7,960/quintal by September 17. Lower returns may impact next season's acreage.*
- *In the global market, edible oil prices declined for the second consecutive session, with Malaysian palm oil closing nearly 1% lower, while Chicago soybean oil also weakened. Palm oil prices were pressured by weakness in energy and soybean oil prices, along with concerns over higher production, weaker exports and rising inventories in Malaysia.*
- *Global soybean prices rose around 7% over the past month, supported by higher energy prices, firm demand and active Chinese buying for MY 2026-27. Chicago soybean futures gained 8%, while US and Brazilian FOB prices increased to \$530/MT and \$540/MT, respectively. Canola prices also remained firm, while USDA raised global rapeseed production for MY 2026-27 to nearly 100 million MT.*
