Daily Pulses Report 06th October 2026

News Highlights

- *IMD forecasts heavy rainfall over parts of Kerala, South Interior Karnataka, Tamil Nadu, Puducherry and Karaikal today. Thunderstorms with lightning and gusty winds are likely across several northern, central, eastern and northeastern states, while light rain or drizzle with thunderstorms may occur in Delhi during the evening.*
- *Today Market: Tur and Chana remained unchanged across key markets. Urad was mostly steady, with Delhi SQ down ₹50/q. Moong gained ₹100/q at Jaipur and Jabalpur, while Masoor remained unchanged. Matar Kanpur declined ₹50/q, and Kabuli 42–44 at Indore was unchanged.*
- *India and Canada have begun the fifth round of CEPA negotiations, with agriculture expected to be a key challenge. Discussions include predictable market access for pulses and fertilizers, technical standards and worker visas. Canada is seeking long-term, enforceable access for its pulses, while India is seeking greater certainty on agricultural trade terms.*
- *Gujarat has extended the MSP procurement registration deadline for groundnut, moong, soybean and urad to 24 Oct 2026 from 9 Oct. Groundnut, soybean and urad acreage is above the three-year average, while moong acreage is lower. The extension gives farmers more time to register for government procurement.*
- *Mustard and chickpea prices in India are trading significantly above MSP ahead of the 2027-28 winter crop sowing season, supported by firm global edible oil and pulse prices. Mustard in Bharatpur is above ₹8,000/q, around 21% above the ₹6,613 MSP, while chickpeas are at ₹7,000–7,200/q, about 17% above the ₹5,958 MSP. High global palm, soybean and sunflower oil prices are also supporting domestic oilseed prices, while the government is considering releasing around 2 MMT of chickpeas from reserves to ease prices.*
- *Australia received widespread rainfall during the week, with 10–100 mm recorded across Victoria, southeastern South Australia, NSW and Tasmania, while parts of eastern Victoria received over 100 mm. Western Australia also saw 10–50 mm and locally higher falls, while Queensland's northeast received 15–50 mm. The highest weekly rainfall was 216 mm at Lorne, Victoria.*
- *Australia's lentil exports rose 34% in August to 117,018 MT, driven primarily by a massive surge in shipments to India, which more than doubled its imports to 86,429 MT.*
- *Global edible oil prices remained under pressure, with Malaysian palm oil and Chicago soybean oil prices declining. Malaysian crude palm oil futures closed lower on Tuesday as weaker energy and soybean oil prices, along with a significant rise in September stocks, weighed on prices.*
