Daily Pulses Report 08th October 2026

News Highlights

- The southwest monsoon is steadily withdrawing, with the IMD expecting further retreat over the next 3–4 days. The 2026 monsoon ended 13% below LPA, while rainfall is likely to continue over parts of eastern, northeastern and southern India, including Karnataka, Kerala and Tamil Nadu.
- Today Market: Pulses traded firm across major markets. Tur, chana and urad gained across key centres, with urad showing the strongest movement. Moong was mixed, while masoor and matar remained unchanged; Kabuli rose ₹200 in Indore.
- NCCF's PSS Rabi Chana 2026 sale tender on 8 October 2026 recorded the highest bid at ₹8,111/quintal in Gadag, Karnataka, followed by ₹7,726/quintal in Latur, Maharashtra, ₹7,425/quintal in Surendranagar, Gujarat, and ₹7,352/quintal in Betul, Madhya Pradesh.
- India's retail inflation is expected to rise to a 23-month high of around 5.6% in September, driven mainly by higher food and fuel prices. Food inflation could reach 7–8%, with vegetables, sugar, cereals, pulses and edible oils contributing to the increase, while core inflation is estimated at 4.3%. The RBI has already raised the repo rate by 25 bps to 5.5% and expects inflation to remain elevated in the coming quarters, with a peak of around 6% in Q3 FY27.
- Ukraine's lentils have a timing advantage in global markets, reaching export destinations about one month ahead of Russia and Kazakhstan and around three months ahead of Canada and Australia. Ukraine's lentil acreage is expanding, while ample global supply and large carryover stocks in Canada and Australia remain key market factors. India remains the major buyer, with future demand dependent on its domestic crop and import policy.
- Global edible oil prices firmed during the evening session, with Malaysian palm oil futures closing higher and Chicago soybean oil also recovering. Indian buying, stronger energy prices and gains in soybean oil supported market sentiment.
- Malaysian palm oil futures rose 3.07% to MYR 4,663/t on October 8, supported by strong Indian demand, with around 150,000 MT of CPO purchased for November–December delivery. Expectations of higher palm oil demand amid Black Sea sunflower oil disruptions, possible Malaysian export-duty relief and firmer crude oil prices also supported prices.
- Indonesia's soybean prices have risen around 10% to Rp13,200/kg, increasing costs for tofu and tempeh producers. Higher raw material, energy and logistics costs are prompting some small processors to cut production or product sizes, while the government is considering soybean subsidies to contain costs and food-price pressures.
