Daily Pulses Report 09th October 2026

News Highlights

- *IMD has forecast heavy rainfall with thunderstorms, lightning and gusty winds over Kerala, Tamil Nadu, Puducherry, Karaikal, Mahe, South Interior Karnataka and Uttarakhand. Thunderstorms are also likely over several parts of eastern and central India, while hot and humid conditions are expected over Konkan and Goa through tomorrow.*
- *India's southwest monsoon rainfall was 12.6% below normal, with drought conditions reported in parts of Karnataka, Maharashtra and Andhra Pradesh. The situation highlights the need for stronger water security, drought management and a shift toward less water-intensive crops, particularly in water-stressed states.*
- *Today Market: Tur prices gained ₹150–200 across Akola, Solapur and Chennai. Chana and Urad were mostly firm, while Moong increased ₹50–100 across major markets. Masoor remained steady to slightly weak, Matar was largely unchanged, and Kabuli declined ₹100 at Indore.*
- *NAFED's PSS chana sell tender on 9 Oct 2026 saw the highest bid at ₹8,001/q in Akola, up ₹200 from 7 Oct. Other highest bids were ₹7,575/q in Rajkot, ₹7,515/q in Sikar, and ₹7,475/q in Khandwa/Hard-a, with gains of ₹52, ₹15 and ₹74, respectively.*
- *NCCF's Rabi 2026 chana tender recorded no sale in Maharashtra, Gujarat and Karnataka. The best bids were ₹7,726/q in Maharashtra, ₹7,425/q in Gujarat and ₹8,111/q in Karnataka.*
- *India's vegetable oil production may decline by 5–10% in MY 2026-27 due to adverse weather and drought in parts of Maharashtra. El Niño-related impacts on Southeast Asian palm oil yields could tighten global supplies in late 2026 and 2027, potentially raising vegetable oil prices and India's import costs, as the country imports over 16 million MT annually.*
- *Malaysian palm oil futures fell 1.48% to MYR 4,592/MT on Friday after the government did not announce the expected temporary export duty waiver. Despite the decline, palm oil gained 1.26% for the week, while expectations of record-high September stocks, higher production and sluggish exports weighed on sentiment; lower crude oil prices also added pressure.*
- *Indonesia plans to centralize palm oil exports through state-owned PT Danantara Sumberdaya Indonesia (DSI) from 2027, while increasing biodiesel blending mandates to boost domestic consumption. As Indonesia accounts for around 57% of global palm oil production, tighter export availability and possible logistical disruptions could support global palm oil prices and increase volatility across the vegetable oil market, particularly affecting India's import costs.*
