Daily Pulses Report 19th October 2026

News Highlights

- *IMD has forecast heavy to very heavy rainfall over Tamil Nadu, Puducherry and Karaikal over the next two days, with heavy rain likely in Andhra Pradesh, Kerala, Mahe and South Interior Karnataka until tomorrow. Thunderstorms, lightning and gusty winds are also expected across Maharashtra, Konkan-Goa, Telangana, Madhya Pradesh, Chhattisgarh and several other regions.*
- *Today's market: Tur prices declined by ₹50 in Akola and ₹25 in Chennai, while Solapur remained unchanged. Chana fell by ₹50 in Delhi and Bikaner, with Raipur steady. Urad gained ₹50 in Delhi, while Chennai and Guntur were unchanged. Moong remained stable across all tracked markets. Masoor eased ₹25 in Delhi, while Katni and Kolkata were unchanged. Matar declined ₹25 in Kanpur, with Mundra and Kolkata Canada-origin prices steady. Kabuli chana (42–44) rose by ₹200 in Indore.*
- *Urad prices declined during the week ended 17 October due to lower import offers and rupee appreciation, while competitive Brazilian supplies pressured Myanmar urad. Domestic prices remained mixed, with better-quality stocks receiving support from millers and stockists. Fresh arrivals have begun in Uttar Pradesh, with higher supply pressure expected after Diwali.*
- *Tur prices declined during the week ended 17 October due to rupee appreciation, lower import costs and weak mill demand as festive buying was largely completed. However, expectations of lower kharif production and drought concerns in Maharashtra and southern states are limiting selling pressure, while stockists remain reluctant to sell amid expectations of higher prices next season.*
- *Chana prices declined by ₹200–250/quintal during the week ended 17 October due to increased NAFED and NCCF sales at lower prices, rising Australian supplies and fresh Canadian yellow pea arrivals. A stronger rupee, lower Australian offers and weak chana dal and besan demand further limited price recovery, with millers largely completing their Diwali purchases.*
- *Global edible oil prices declined during the evening session, with Malaysian palm oil futures closing lower amid weakness in Chicago soyoil and other competing edible oils. The broader weakness across vegetable oil markets pressured palm oil prices.*
- *Malaysian palm oil futures edged down 0.06% to 4,766 ringgit/MT on October 19 due to elevated inventories, weaker Chicago soyoil and declining crude oil prices. Gains in Chinese soybean and palm oil futures limited losses, while lower Malaysian palm oil exports and logistical issues in Indonesia added uncertainty. Market direction will depend on inventory trends, export demand, competing vegetable oil prices and potential changes in Malaysia's export duty policy.*
