Daily Pulses Report 22nd October 2026

News Highlights

- The IMD has issued orange and yellow alerts for heavy to very heavy rainfall across Kerala and Tamil Nadu, with a low-pressure area likely to form over the southwest Bay of Bengal near the Tamil Nadu coast. Rain, thunderstorms and gusty winds may continue through October 26. A landslide near Parassala in Kerala derailed a train locomotive on Thursday, disrupting several rail services, though all passengers and staff were safe.
- The Centre has strengthened El Niño preparedness, updating contingency plans for 262 vulnerable districts and identifying 315 districts at risk from weak monsoon conditions. Measures include promoting pulses, millets and oilseeds, ensuring seed and fertiliser supplies, and monitoring water and food stocks. Meanwhile, Tamil Nadu reported electricity demand rising to 21,700 MW, while Telangana is preparing for potential water, agricultural and power challenges through June 2027.
- Today's market: Tur declined by ₹150 in Akola, while Solapur and Chennai remained unchanged. Chana gained ₹25 in Delhi and ₹150 in Raipur but fell ₹75 in Bikaner. Urad declined by ₹50 in Chennai and Delhi and ₹250 in Guntur. Moong eased ₹100 in Jaipur, while Delhi remained unchanged. Masoor fell ₹50 in Delhi, with Katni and Kolkata unchanged. Matar declined ₹50 in Kanpur and ₹25 at Mundra (Canada), while Kolkata remained unchanged. Kabuli chana (42–44) gained ₹200 in Indore.
- Australia recorded widespread rainfall, with thunderstorms bringing 15–50 mm or more to central regions, including Alice Springs. Parts of Queensland and coastal north-eastern New South Wales received 50–200 mm, triggering minor to major flooding in south-eastern Queensland. Mount Jukes in Queensland recorded the highest weekly rainfall of 217 mm, while Chatswood Bowling Club in NSW received 106 mm in 24 hours.
- Global palm oil prices rose 0.5% on October 22, with Malaysia's January 2027 futures reaching 4,793 ringgit/MT(\$1,174/MT), supported by a 58.5–78.4% increase in Malaysian exports during October 1–20, gains in soybean oil prices and higher crude oil prices. Strong export demand and seasonal production declines may support prices, while elevated Malaysian stocks and weaker trading activity could limit further gains. The MPOC expects crude palm oil prices to remain above 4,600 ringgit/MT in November.
- India is exploring higher palm oil imports from Colombia and African countries to diversify supplies amid rising biodiesel demand in Southeast Asia. India imported 15.16 million MT of edible oils during the first 11 months of 2025-26, while the government raised the 2027-28 rapeseed and mustard MSP by ₹413 to ₹6,613/quintal to encourage domestic production.
