- *Myanmar-origin urad prices strengthened across major markets during the week ended 26 Sep, supported by firmer offers, slower imports and limited fresh Myanmar SQ business. Brazil urad remained steady and continued to attract South Indian millers at lower levels, while rains during harvesting raised concerns over Kharif urad quality and yields; buying remained largely need-based.*
- *Tur prices traded steady to firm during the week ended 26 Sep 2026, supported by higher dal prices, mill buying and firmer African CNF offers. Drought concerns in Karnataka and Maharashtra and limited stockist selling provided additional support, though mixed mandi trends kept gains selective.*
- *Chana prices continued to rise during the week ended 26 Sep 2026, supported by strong festive dal and besan demand, limited private selling and lower mandi arrivals. Reduced imports, slow NAFED selling and concerns over rabi sowing due to rainfall deficits kept the market firm.*
