Daily Pulses Report **29th September 2026**

News Highlights

- *The India Meteorological Department (IMD) has forecast heavy rainfall in parts of India. The detailed location and rainfall warning are not visible in the excerpt provided; if you share the next part of the article, I can make it into a short 2–3 line weather update.*
- *Deficient and uneven monsoon rainfall may affect India's upcoming rabi wheat production, particularly in rainfed areas where soil moisture remains low. The government expects separate strategies for rainfed and irrigated regions, with wheat sowing due to begin in October.*
- *India's September rainfall has remained within the normal range so far, with the seasonal deficit improving to 12% from 14% by August 31. However, extreme rainfall on September 26 caused flooding and crop damage in parts of Uttar Pradesh, highlighting uneven rainfall distribution and risks to agriculture.*
- *Today's Market : Tur prices gained ₹50–100 across Akola, Solapur and Chennai, while urad rose ₹75–150 across major markets. Chana was mixed, moong declined ₹100–150, masoor remained unchanged, matar was mostly steady, and Kabuli 42–44 in Indore gained ₹200.*
- *NCCF is targeting ₹17,200 crore turnover in FY27, up over 24% from ₹13,908 crore in FY26, as it expects higher agricultural commodity procurement under PSS. NCCF procured over 2 million MT of paddy, onions, oilseeds, pulses and wheat from 5.5 million farmers in FY26 and currently accounts for about 35% of PSS oilseed and pulse procurement.*
- *NAFED PSS Chana Rabi-26 Bid Approved – 28 Sep 2026: Maharashtra 1,120 MT at ₹7,201/q, Rajasthan 100 MT at ₹7,101/q, taking the total approved quantity to 1,220 MT.*
- *The government has asked states to finalise Rabi 2026 crop plans by 29 Sep, based on water availability, soil moisture and local agro-climatic conditions. Lower-water crops such as pulses and oilseeds are being prioritised in water-stressed areas, with emphasis on timely procurement, seed and fertiliser availability, and weekly crop monitoring.*
- *Brazil is expected to begin exporting pigeon pea (tur) to India from October–November 2026, with initial shipments estimated at 20,000–30,000 MT, subject to phytosanitary clearance. India's tur imports rose 44% to 0.58 million MT in Jan–Jul 2026, while concerns over drought in Karnataka and Maharashtra continue to cloud the 2026 kharif crop outlook.*
